

# NOMADIX CASTING

Secure and Easy In-Room Entertainment Solution for Streaming Directly from Guest Devices

As more people “cut the cord” and stream their own content at home, the guest preference to access this same content while traveling has significantly increased. They want to watch their own content by casting it directly to the hotel TV as easily as they can at home. Whether it’s to watch the latest Netflix episode, to work out, listen to music, or stream a business training video, guests want to effortlessly watch their own content without having to remember passwords or log onto a public device. They want a simple, secure and seamless experience.

Other solutions on the market require guests to use the remote to choose from the limited apps available on the hotel TV and then slowly click each letter and number to enter their usernames and passwords for each app used. Then guests need to trust that the hotel will remove these credentials after they leave the property.

Nomadix Casting allows guests to easily and securely stream preferred media content from their mobile devices onto the in-room TVs with no need to log into these apps again. Guests choose what they want to watch on popular apps such as Netflix, Hulu, Disney+, Spotify, Amazon, YouTube and many more. Thousands of options are available so guests are not limited to just the sources typically offered by other types of casting or streaming solutions.

## HOW IT WORKS

Nomadix gateways provide authenticated, managed internet access for millions of hotel rooms at properties all over the world. For hotels with Nomadix gateways integrated with the property management system (PMS), guest devices are automatically recognized and connected to the in-room TV upon authentication to the Wi-Fi network. No logins or additional steps are needed. Guests can open their app of choice and hit cast to watch shows or other content instantly.

For properties implementing Nomadix Casting as a standalone solution, guests can simply aim their cameras at the QR code to connect their mobile devices. After that, all they need to do is choose what they want to watch and select the casting button in the app of the content provider.

Unlike mirrored casting solutions, once streaming starts, the process is offloaded to the casting server, which allows guests to use their iOS or Android devices without interrupting the streaming content.

Nomadix Casting on the in-room TV can also match the brand guidelines of the hotel to provide a consistent guest experience.

## FEATURES & BENEFITS

Automatic pairing of guest devices at properties leveraging the Nomadix Hotel Portal with a PMS integration

Support for guest content from over 2000 apps including Netflix, Hulu, YouTube and Spotify

Simplified authentication using an on-screen QR code

Ability to use the mobile device for other functions while casting

Contactless experience as guests use their own devices and avoid the remote

Support for both iOS and Android

Numerous languages supported

Built-in reliability and security

Easy-to-use, web-based management platform

Customizable with hotel branding

## AVAILABILITY

Nomadix Casting is generally available globally.
