NOTE: You must reboot for Banner Image or Button Image settings changes to take effect.

Reboot after changes are saved? Yes

Step 2: Configure the ICC Buttons.

For each button, enter in the Name/Text that you want for each button, the website (Target URL) that you want the user to go to when clicked on, and the image name for the image you want displayed.

If you are creating your own images, you will need to ftp them to the NSE’s flash directory. You will also need to name them using the 8.3 naming convention.

Use the following parameters when defining images for buttons and banners:

- Banners** – 373 pixels (width) x 32 pixels (height)
- ISP Button** – 98 pixels (width) x 26 pixels (height)
- Small buttons** – 45 pixels (width) x 26 pixels (height)

Step 3: Configure the Banners.
